### HANDWASH CAMPAIGN

Global Handwashing Day is an annual global advocacy day dedicated to increasing awareness and understanding about the importance of handwashing with soap as an easy, effective, and affordable way to prevent diseases and save lives. Handwashing is an important part of keeping food safe, preventing diseases, and helping children grow strong. Yet, handwashing is not practiced as consistently or as thoroughly as it should be. Hence, the Department of Chemistry organized handwash campaign on 15<sup>th</sup> October 2020 at Kandithampattu, Thanjavur to raise the awareness of the importance of handwashing and encourages action to promote and sustain handwashing habits. The campaign started with a short briefing & demonstration by Ms. G. Gnanashree, Head and Assistant Professor, Bon Secours College for Women, Thanjavur about the need to maintain proper hygiene followed by an informative talk by Ms. B. Kavibharathi, III B.Sc. Chemistry which clearly indicated that proper hand hygiene can significantly reduce the spread of harmful bacteria and other germs that can lead to diarrhoea, vomiting and other harmful infections like corona, etc.
